ELSEVIER

Journal of Magnetism and Magnetic Materials 193 (1999) xv–xix

Journal of magnetism and magnetic materials

# Contents

Preface xi

MRM'98 Organisation xii

Acknowledgement xiii

Contents xv

**History of magnetic recording**

F. Jorgensen
The inventor Valdemar Poulsen (Invited paper) 1

M.H. Clark
Making magnetic recording commercial: 1920–1955 (Invited paper) 8

W. Andriessen
'THE WINNER'; compact cassette. A commercial and technical look back at the greatest success story in the history of AUDIO up to now (Invited paper) 11

S.B. Luitjens and A.M.A. Rijckaert
The history of consumer magnetic video tape recording, from a rarity to a mass product (Invited paper) 17

B.K. Middleton
Developments in magnetic recording on rigid disks (Invited paper) 24

**Keynote about the future of magnetic recording**

D.E. Speliotis
Magnetic recording beyond the first 100 Years (Invited paper) 29

**Magnetic and magneto-optic media**

M. Futamoto, N. Inaba, Y. Hirayama, K. Ito and Y. Honda
Microstructure and micromagnetics of future thin-film media (Invited paper) 36

M. Takahashi and H. Shoji
Physics of high density recording thin film media established by ultra clean sputtering process (Invited paper) 44

L.N. He, Z.G. Wang, D.J. Mapps, D.T. Wilton and P. Robinson
Comparison of track edge noise between oriented and isotropic thin film media in quasi-contact magnetic recording 52

H. Muraoka, T. Shoji, I. Watanabe, Y. Sugita and Y. Nakamura
Recording characteristics of perpendicular media deposited on a ferrite disk substrate 55

H. Suzuki, D.D. Djayaprawira, Y. Takahashi, A. Ishikawa, T. Ono and Y. Yahisa
Effects of Cr–N–$ZrO_2$ seed layer formed on glass substrates for longitudinal recording media 59

S. Nakagawa, M. Hatakeyama, K. Takayama and M. Naoe
Study of initial growth region of $Co_{83}Cr_{17}$ in $Co_{83}Cr_{17}/Co_{67}Cr_{33}$/Cr trilayered films for longitudinal recording media 63

N. Matsushita, M. Ichinose, S. Nakagawa and M. Naoe
Co–Zn ferrite films prepared by facing targets sputtering system for longitudinal recording layer 68

K. Noda, T. Kawanabe and M. Naoe
Recording characteristics and magnetic grains of rigid disks using silicon substrates deposited by facing targets sputtering 71

G.R. Jones, M. Jackson and K. O'Grady
Determination of grain size distributions in thin films 75

M. Takahashi, A. Kikuchi, J. Nakai and H. Shoji
Effect of ultraclean sputtering process on Cr segregation in CoCrTa thin film media 79

T. Suzuki, K. Harada, N. Honda and K. Ouchi
Preparation of ordered Fe–Pt thin films for perpendicular magnetic recording media 85

0304-8853/99/$ – see front matter © 1999 Elsevier Science B.V. All rights reserved.

L. Wu, T. Kiya, N. Honda and K. Ouchi
Medium noise properties of Co/Pd multilayer films for perpendicular magnetic recording 89

N. Sharma, S.M. Casey, G.A. Jones and P.J. Grundy
Ion beam assisted deposition of CoPt films 93

Y. Kitamoto, S. Kantake, F. Shirasaki, M. Abe and M. Naoe
Low-temperature fabrication of Co ferrite thin films with high coercivity for perpendicular recording disks by wet process 97

J. Ariake, T. Kiya, N. Honda and K. Ouchi
Magnetic and noise properties of Nb added Co–Cr perpendicular medium 101

N. Honda, K. Ouchi and S. Iwasaki
Noise source and noise spectrum of perpendicular recording media 106

A. Morisako, M. Matsumoto and M. Naoe
Properties of *c*-axis oriented Ba-ferrite sputtered films 110

S. Kadokura and M. Naoe
Perpendicular Co–Cr thin films using a new sputtering plasma generating apparatus 114

P.L. Kim, C. Lodder, N.H. Luong and T.D. Hien
The influence of tantalum content in relation to substrate temperature on magnetic and structural properties of Co–Cr–Ta thin films 117

N. Matsushita, J. Feng, T. Siosawa, S. Nakagawa and M. Naoe
Relationship between coercivity and deposition conditions of Ba ferrite films prepared by facing targets sputtering apparatus 121

H. Jia, J. Veldeman and M. Burgelman
Effect of helium partial pressure on DC-magnetron sputtering of Co–Cr films 124

J. Veldeman, H. Jia and M. Burgelman
Influence of magnetron configuration on CoCr films sputtered on flexible substrates 128

Şt.C. Bădescu, V. Bădescu, N. Rezlescu and R. Bădescu
Modeling the nonlinear dynamics of magnetic domain walls 132

T.-h. Wu, J.C.A. Huang, L.C. Wu, L.X. Ye and J.Q. Lu
Buffer layer effect on magnetic domain structure and coercivity in epitaxial Co/Pt multilayers 136

E. Rezlescu and N. Rezlescu
Garnet films for storage applications: growth and properties 140

A. Furuya, H. Yoshikawa, T. Ohkubo, M. Yamamoto, P. Tailhades, L. Bouet, C. Despax, L. Presmanes and A. Rousset
Magneto-optical properties of a sputtered Bi-substituted Dy iron garnet-ferrite/spinel-ferrite bilayer 143

P. Tailhades, C. Bonningue, A. Rousset, L. Bouet, I. Pasquet and S. Lebrun
About the interesting properties of mixed-valence defect spinel ferrites for mass storage media 148

J. Feng, N. Matsushita, T. Murakoso, S. Nakagawa and M. Naoe
Effects of Al substitution for Fe in Ba ferrite thin films 152

T.-h. Wu, J.C. Wu, B.-M. Chen and H.-P.D. Shieh
Pinning magnetic domain via patterning artificial lattice under amorphous magnetic layer 155

L. Uba, S. Uba, A.N. Yaresko, A.Ya. Perlov, V.N. Antonov and R. Gontarz
Ab initio study of interface alloying effect on magneto-optical spectra in Co/Pt multilayers 159

R.A. Fry, L.H. Bennett, E.D. Torre, R.D. Shull, W.F. Egelhoff Jr., R.F.C. Farrow and C.H. Lee
Magneto-optical measurements of Co-Pt (1 1 1) multilayers 162

J.C.A. Huang, T.H. Wu, A.C. Hsu, L.C. Wu and Y.M. Hu
Structure and perpendicular magnetic anisotropy of a new $CoPt_x$ alloy grown by MBE 166

C. Bordel, S. Pizzini, J.C. Toussaint, B. Kervorkian and J. Voiron
Magnetic properties of amorphous nitrogenated TbFeCo thin films 170

E. Gan'shina, V. Guschin, I. Romanov, A. Skobelev and A. Tselev
Co–Pd alloy films for magneto-optical recording 174

V. Ilkovič, S. Tuleja and D. Blažek
Magnetic properties of superlattice-configured thin films with variable interlayer couplings 177

S. Stavroyiannis, I. Panagiotopoulos, D. Niarchos, J.A. Christodoulides, Y. Zhang and G.C. Hadjipanayis
Investigation of CoPt/M (M = Ag, C) films for high density recording media 181

**Magnetic media and MRAM technology**

M. Naoe and S. Kadokura
Preparation of Co–Cr–Ta films with nano-size magnetic domains for 1000 kfci media (Invited paper) 185

B. Cord, O. Keitel, H. Rohrmann and J. Scherer
Influence of target composition and sputter conditions on magnetic properties of hard disks 192

**Relaxation effects and interactions**

N.S. Walmsley, R.W. Chantrell and J.J. Miles
Microstructural effects in computer simulations of the magnetic and recording properties of thin film media (Invited paper) 196

G. Bottoni, D. Candolfo and A. Cecchetti
Thermal relaxation of the magnetization in recording media 204

R. Wood, J. Monson and T. Coughlin
On the thermal decay of magnetization in the presence of demagnetizing fields and a soft magnetic layer 207

H.J. Richter and R.Y Ranjan
Relaxation effects in thin film media and their consequences (Invited paper) 213

L.S. Prichard and K. O'Grady
High speed switching in metal particle recording media 220

K. Sato, Y. Yoshida, C. Okuyama, I. Okamoto and M. Shinohara
Reproduced output reduction in thin film media by thermal fluctuations 224

**Time dependence and interactions**

R. Inamura, K. Sato and T. Mizoguchi
Reduction of remanence in CoCrTaPt high density recording media by pulse field 229

K. Tanahashi, I. Tamai, Y. Takahashi, T. Kanbe and Y. Hosoe
Reduction of thermal decay in longitudinal recording media with a CoCr intermediate layer 232

G. Bottoni, D. Candolfo and A. Cecchetti
Experimental study of the interactions in CoCr thin films 237

H. Akimoto, Y. Yoshida, C. Okuyama, I. Okamoto and M. Shinohara
Magnetic relaxation in thin film media as a function of orientation ratio 240

J.D. Hannay, N.S. Walmsley and R.W. Chantrell
A computational model of thermally activated high speed magnetisation reversal in longitudinal thin film media 245

P.L. Kim, C. Lodder and T. Popma
Field dependence of magnetic viscosity of CoCrTa in-plane media 249

Y. Hirayama, K. Ito, Y. Honda, N. Inaba and M. Futamoto
Thermal stability of CoCr-alloy perpendicular magnetic recording media 253

A. Lisfi, J.C. Lodder, P. de Haan, T. Bolhuis and F.J.G. Roesthuis
Magnetic relaxation in barium ferrite films with perpendicular anisotropy 258

H. Laidler, K. O'Grady, T.M. Coughlin and J.H. Judy
Demagnetising field reduction in keepered media 262

**MP and ME recording media**

K.J. Kim, J. Farkas, D. Hasman, T. Miller, J. Zellia and P. Jacobs
Recent developments in binder design for advanced media (Invited paper) 265

G.W. Warren, R. Sharma, D.E. Nikles, Y. Hu and S.C. Street
Amine quinone polyurethane polymers for improved performance in advanced particulate media 276

R.J. Veitch, A. Ilmer, W. Lenz and V. Richter
MP technology for a new generation of magnetic tapes (Invited paper) 279

T. Mercer, P.R. Bissell, J.A. Gotaas and R.G. Gilson
Hindered settling of particulate dispersions 284

L. Rezlescu, E. Rezlescu, P.D. Popa and N. Rezlescu
Fine barium hexaferrite powder prepared by the crystallisation of glass 288

T. Kamei, N. Kishii and K.-i. Kurihara
Removal of brown stain on magnetic head by a chelating agent on magnetic tapes 291

K. Kurihara, M. Matsute, H. Watanabe, N. Kishii, T. Ono, H. Kondo and M. Ata
Development of highly reactive hardening agents for MP tapes 296

K.S. Jeon and A.M. Lane
Polymer adsorption on magnetic particles 300

T. Omura, T. Ono, N. Nagai and H. Kondo
Effect of dispersibility of fine particles on electromagnetic property 303

V.T. Peikov, K.S. Jeon and A.M. Lane
Characterization of magnetic inks by measurements of frequency dependence of AC susceptibility 307

V.T. Peikov, K.S. Jeon and A.M. Lane
Transverse susceptibility of magnetic inks. milling process 311

M.P. Morales, C.J. Serna, K. O'Grady, L.S. Prichard, J.A. Hutchings, G.H. Milford and D.P.E. Dickson
Origin of switching field distribution in M-P pigments 314

D.J. Perettie, T.A. Morgan, Q. Zhao, H.-J. Kang and F.E. Talke
The use of phosphazene additives to enhance the performance of PFPAE lubricants 318

G.N. Coverdale, A. Satoh, R.G. Gilson and R.W. Chantrell
Computational studies of the orientation of advanced particulate media during coating and drying 322

G. Bottoni, D. Candolfo, A. Cecchetti and F. Masoli
Magnetic anisotropy distribution in Ba ferrite particles 326

G. Bottoni, D. Candolfo, A. Cecchetti and F. Masoli
Analysis of the magnetization switching using the rotational hysteresis integral 329

T. Bolhuis, L. Abelmann, J.C. Lodder and E.O. Samwel
On the vectorial calibration of a vibrating sample magnetometer for thin film measurements 332

E.O. Samwel, T. Bolhuis, D. Speliotis and J.C. Lodder
Vectorial measurements of the angular coercive field 337

M. Jackson, L.S. Prichard, K. O'Grady and P.I. Mayo
Determination of switching field distribution and easy axis distribution in metal particle tape 342

S. Lalbahadoersing, J.P.J. Groenland, S.B. Luitjens and J.C. Lodder
Recording characteristics as a result of the special morphology of ME tape 345

O. Kohmoto, T. Tsuda and H. Kitamura
Ferromagnetic resonance in digital-video ME tapes 349

M.D. Bijker, E.M. Visser, J.C. Lodder and Th.J.A. Popma
Optimisation of obliquely sputter deposited media 352

M.D. Bijker, L. Abelmann, J.C. Lodder and Th.J.A. Popma
The role of oxygen in obliquely deposited tapes 357

S.M. McCann, P.R. Bissell, T. Onions and R.G. Gilson
Effects of playback on saturation remanent state noise 362

S.M. McCann, P.M. Sollis, P.R. Bissell and T. Onions
Noise characterisation of barium ferrite dispersions 366

K. Kuga, Y. Yoneda, J. Numazawa and M. Naoe
Large output and high density recording tape with perpendicular magnetic Co–Cr–Ta film for VCR 370

T. Suzuki
Particle size effect on recording performance and thermal stability in high-density particulate tapes 374

K. Okamoto, Y. Sasaki, T. Kudo, K. Sasaki, Y. Nishida, N. Maeda and H. Kondo
Development of high capacity floppy disk "HiFD" (Invited paper) 378

E.A. Draaisma, S.R. Cumpson, T.P.H.G. Jansen, P. Hidding and S.B. Luitjens
Performance of advanced tapes with DigaMax™ thin film heads 384

**Micromagnetics, simulations and recording**

H.N. Bertram and C. Seberino
Numerical simulations of hysteresis in longitudinal magnetic tape (Invited paper) 388

A. Stancu, P.R. Bissell and R.W. Chantrell
Interactions characterisation in particulate magnetic recording media. Experiments and Preisach model 395

Y. Uesaka, Y. Nakatani, N. Hayashi and H. Fukushima
Computer simulation of SNR in longitudinal and perpendicular recording (Invited paper) 399

G.E. Kay, P.R. Bissell, A. Hart and D.A. Parker
A micromagnetic model of metal-evaporated tape 406

S.J. Greaves, H. Muraoka, Y. Sugita and Y. Nakamura
Simulations of time dependence in perpendicular media 409

K. Hattori, T. Aoyama and I. Sato
Three-dimensional magnetization analysis of longitudinal media using merged MR head with submicron track width 412

H.V. Jones, A.W.G. Duller, R.W. Chantrell, A. Hoare and P.R. Bissell
Application of neural networks to the determination of $H_K$ distributions from transverse susceptibility data 416

N.S. Walmsley, R.W. Chantrell and K. O'Grady
Simulation of the effects of FCC grains on the remanence of thin film media 420

P.H.W. Ridley, G.W. Roberts, M.A. Wongsam and R.W. Chantrell
Finite element modelling of nanoelements 423

L. Veiller, D. Ledue and J. Teillet
Magnetic properties of Fe/Tb multilayers: a Monte Carlo investigation 427

K. Aso, T. Sato and M. Ishibashi
Magnetic force microscopic study of magnetic tapes recorded at MHz frequencies 430

G.N. Phillips, T. Suzuki, K. Takano and M. Takahashi
MFM analysis of recorded bits written by trimmed and untrimmed MR heads 434

R.J. Prance, T.D. Clark, H. Prance and G. Howells
Imaging of magnetically recorded data using a novel scanning magnetic microscope 437

R.H. Arnold, M. Dresenkamp and H. Faber
Two-dimensional measurements and presentation of media recording properties 441

S. Lalbahadoersing, J.P.J. Groenland, S.B. Luitjens and J.C. Lodder
Modeling and analysis of overwrite behavior versus increasing head field in thin MP tape 444

M.M. Aziz, B.K. Middleton and J.J. Miles
The nature of recorded magnetisation transitions in thin film media 448

Z.G. Wang, L.N. He, D.J. Mapps and D.T. Wilton
Read-while-write operation in magnetic recording 452

A. Kratzert, F. Obernosterer and W.F. Oehme
Estimation of data dependent transition displacement in thin film media 455

M.M. Aziz, B.K. Middleton and J.J. Miles
The effect of finite pole lengths of replay heads on the signal and noise characteristics of thin film recording media 458

K. Yoshida, Y. Hirayama, M. Igarashi, M. Futamoto and Y. Sugita
Switching mechanism of a perpendicular magnetic recording medium at very low temperature 462

H. Ishigaki, Y. Konishi, K. Kondo and K. Koterazawa
Possibility as a magnetic recording media of austenitic stainless steel using stress-induced phase transformation 466

**Magnetic recording and MFM**

S.M. Casey, E.W. Hill, J.J. Miles, P. Sivasamy, J.K. Birtwistle, B.K. Middleton, J. Rose and J.N. Chapman
A study of recorded bit patterns using TEM and MFM 470

S.J.L. Vellekoop, L. Abelmann, S. Porthun, J.C. Lodder and J.J. Miles
Calculation of playback signals from MFM images using transfer functions 474

P. Arnett, T. Minvielle and S. Nair
Extracting media noise characteristics from MFM images 479

**GMR, solid state memory and phase change**

T. Luciński and G. Reiss
In situ monitoring of GMR and $M(H)$ evolution during Co/Cu multilayers growth 484

D. Saluel, J. Daval, B. Béchevet, C. Germain and B. Valon
Ultra high density data storage on phase change materials with electrical micro-tips 488

**Head materials**

S. Honda, H. Yamane, M. Nishino and M. Nawate
Granular-type giant magnetoresistance of Co–Ag and FeCo–CoAg films deposited with tandem method 492

G. Chern, D.S. Lee, H.C. Chang and T.-h. Wu
Crystalline anisotropy effects on magnetoresistance in epitaxial spin-valve sandwiches with antiferromagnetic NiO films 497

E. Rezlescu and N. Rezlescu
Magnetoresistance effect in the $Mn_{1-x}Zn_xFe_2O_4$ ceramics 501

A.M. Goodman, K. O'Grady, M.R. Parker and S. Burkett
Competing sweep-rate dependent effects in the hard-loop of spin-valve multilayers 504

I. Sakamoto, H. Tanoue, N. Hayashi, S. Honda, M. Nawate and Y. Ikeda
Ar ion irradiation in Au/Fe multilayers 507

**Trends and future**

M.A.M. Haast, I.R. Heskamp, L. Abelmann, J.C. Lodder and Th.J.A. Popma
Magnetic characterization of large area arrays of single and multi domain CoNi/Pt multilayer dots 511

J.L. Weston, A. Butera, D. Otte and J.A. Barnard
Nanostructured magnetic networks: a materials comparison 515

H.J. Borg and R. van Woudenberg
Trends in optical recording (Invited paper) 519

Author index 526

Subject index 533
